

Report to Chale annual parish meeting 13 May 2024

Sustainable Chale Ltd

While many of the homes in the village are well insulated and many green energy measures have been installed, the charity plans to work with 'Future Isle of Wight' to focus on remaining houses in the parish where grant supported measures could be installed.

The board of Sustainable Chale will also continue to monitor market developments in order to identify other opportunities that we can promote within our community.

Malcolm Groves,

Board member, Sustainable Chale Ltd
