

Report to Chale annual parish meeting 10 May 2023

Sustainable Chale Ltd

Whilst there have been various government announcements during the last year regarding new grant support schemes but we still await details of these proposals, notably Eco+. This was to be launched in April but has now been delayed until the summer and will be called the Great British Insulation Scheme.

Whilst many of the homes in the village are now well insulated and many green energy measures have been installed, the new scheme should enable more to be improved with significant grant support.

When details do finally become available, we will seek to promote them to those who qualify. The board of Sustainable Chale will also continue to monitor market developments in order to identify other opportunities that we can promote within our community.

Malcolm Groves,

Board member, Sustainable Chale Ltd
