

## **Report to Chale annual parish meeting 14 May 2025**

### **Sustainable Chale Ltd**

The current focus of the board of Sustainable Chale is on the Community Hub that is currently under construction at Spanners Close. The trustees are in favour in principle of funding renewables planned for the site. They will also continue to monitor market developments in order to identify other opportunities that we can promote within our community although little has changed in their area of interest so far following the change in government.

We were also sorry to lose one of our directors, Colin Palmer, who stepped down due to ill health. He is well known for the annual 'Going Electric' event as well as a director of Wight Community Energy. We would be pleased to hear from anyone with relevant background and an interest in joining the board.

Malcolm Groves,

Board member, Sustainable Chale Ltd
